

As of 24

There's something about being 24.

It's like knocking on the front door of the rest of your life, right before it all begins. 24 is the last time you sound *that* young. Every age after has a different sound to it.

This book is a collection of every thought, feeling, and phrase I held close while growing from age 19 to 24. The world opens up during that time and you can step in any direction, making every decision feel pivotal and exciting.

So here is my love letter to the girl who lived these lessons. Here is everything I've learned - As of 24.
